FuzzyScan Firmware Upgrade Procedure

(Rev. B9)

This article provides detailed steps on how to upgrade your scanner via FuzzyScan PowerTool 3. You can download the latest utility from Cino's website: http://www.cino.com.tw

System Requirements

- Windows 7 32-bit SP1 or above
- Windows 7 64-bit SP1 or above
- Windows 8 or above
- Windows Vista SP2 or above
- Windows XP SP3 or above
- Windows 10 or above

Applicable Models

Handheld Imagers

- A780, A770, A680, A670, A660, A570, A560 (Firmware 5.00.01 or above)
- F780, L780, F680, L680, F560 (Firmware 6.00.01 or above)
- A788BT, A778BT, A688BT, A678BT, A668BT, A780BT, A770BT, A680BT, A670BT, A660BT (Firmware **5.00.01** or above)
- F788BT, L788BT, F688BT, L688BT, F780BT, L780BT, F680BT, L680BT (Firmware 6.00.01 or above)

Fixed Mount Scanners

- FA480, FA470, FA460 (Firmware 5.00.01 or above)
- FM480 (Firmware 6.00.01 or above)

Companion Scanners

- PA680BT, PA670BT (Firmware 5.00.01 or above)
- PF680BT, PL680BT (Firmware 6.00.01 or above)

Smart Cradles

- HB4132, HB2112 (Firmware **5.00.01** or above)
- HB3112 (Firmware 5.00.01 or above)

Scan Modules and Scan Engines

- SE6850, SE6750 (Firmware 5.00.01 or above)
- SE380, SE480 (Firmware 6.00.01 or above)

Scan Modules

- SM6850, SM6750, SM5800, SM5600 (Firmware 5.00.01 or above)
- SM380 (Firmware 6.00.01 or above)

Upgrade Procedure

FuzzyScan Corded Imagers, Fixed Mount Scanners, Scan Engines, and Scan Modules

- 1. Install FuzzyScan PowerTool 3 on your host.
- 2. Double click the 😰 icon to launch FuzzyScan PowerTool 3.
- 3. Click [Deployment].

4. Click the [Upgrade] option.

Select ye	our desired function			
Upgrade	Upgrade one or more scanners with selected firmware file.)		
	Open a current configuration file and save to multiple scanners.			
Clone	Copy current configuration of a scanner to other scanners.			
			Abort	
		cino		

5. Connect the scanner to the host via a USB or RS232 cable, then click [More Information].

6. Scan the corresponding host interface quick set command. Click [X] to return to the previous menu.

		×
Corded Scanners 1. Connect your scanner to the host with a RS232 or USB interface cable. 2. Scan the quick set command to switch to the corresponding host interface.		
RS232 Serial	T T	
USB Com Port Emulation		
cino		Ċ

7. Scan the [HostLink] barcode. You will hear 4 beep sounds.

8. Click [Continue] to initiate the COM Port scanning.

Connect the scanner	
 Connect your scanner to the host with a USB or RS232 cable. Scan the "HostLink" command on the right to establish a connection. More information Scan the "HostLink" command. 	HostLink
	Previous Abort

9. Wait for FuzzyScan Powertool 3 to scan and locate your scanner. Once detected, double-click on the scanner you want to upgrade.

Connect the scanner	
1. Connect your scanner to the host with a USB or R\$232 cable.	HostLink
2. Scan the "HostLink" command on the right to establish a connection. More information	
3. Scan the "HostLink" command.	
Continue	
Scanning COM ports	and the second
Abort	-p-5/2
	13-12-12-11-

<section-header> Select your desired function Image: Comparison of the second provided o

10. Click on the [Open firmware file]. In the pop-up window, select the correct firmware file for your scanner, then click [Open].

FuzzyScan Smart Cradles

- 1. Install FuzzyScan PowerTool 3 on your host.
- 2. Double click the P icon to launch FuzzyScan PowerTool 3.
- 3. To connect your Smart Cradle to the host:
 - Via a USB cable, you must do so while holding the Paging/Reset button on the Smart Cradle.
 - Via a RS232 cable, first connect your Smart Cradle to the host through the RS232 cable, and then to the Power Supply Unit while holding the Paging/Reset button.
- 4. When you see the left side indicator of the smart cradle flashing green at regular intervals, release Paging/Reset button.
- 5. Click [Deployment].

6. Click the [Upgrade] option on the menu bar.

Select y	our desired function			
Upgrade	Upgrade one or more scanners with selected firmware file.		1	
Deploy	Open a current configuration file and save to multiple scanners.			
Clone	Copy current configuration of a scanner to other scanners.			
			Abort	
		cino		Ċ

7. Click [Continue].

Connect the scanner	
 Connect your scanner to the host with a USB or RS232 cable. Scan the "HostLink" command on the right to establish a connection. More information Scan the "HostLink" command. 	HostLink
cipo	Previous Abort

8. Double click the smart cradle you are going to upgrade.

Connect the scanner		
Select the scanner you wa	nt to connect: F/W : 5.00.08	HostLink
Rescan		

9. Click on [Open firmware file]. Then, click the firmware file you are going to use and click [Open].
